

SANTÉ CENTER FOR HEALING **Partnership Document**

A Co-Occurring Psychiatric and Substance Use Disorder Facility Summary

Since 1996, Santé Center for Healing has guided professionals in the health care industry through treatment into long-term recovery from all substance use disorders and core co-occurring mental health issues.

MISSION

The Mission of Santé Center for Healing is to address addictive behaviors and associated conditions with an integrated addiction treatment model, drawing from traditional and innovative approaches. Our services are open to individuals and families who seek recovery from addictive behaviors, with a focus on treating the addicted professional. Santé provides treatment with integrity. We also promote wellness for the client and provide family support in a safe, public and pleasant setting.

LICENSED PROFESSIONAL ASSESSMENTS

Santé's LPA program offers a fair, precise and objective investigation of a professional in crisis. Data collected in a one to three day assessment is then used to gauge the professional's ability to return to work, provide monitoring recommendations or the necessity for the professional to seek further treatment. Assessments are tailored to the specific needs of the professional and the referring organization; therefore, the different types of testing can vary from one individual to another and can include but are not limited to:

- Psychosocial history and assessment
- Psychological testing
- Clinical polygraph examination
- Preliminary report to referral source and client by telephone by end-of-week of assessment
- Psychiatric evaluation
- Nursing assessment with UDS and hair testing
- Collateral Interviews
- Written, comprehensive report within 2 weeks of assessment

RESIDENTIAL ADDICTION TREATMENT PLAN

The success rate for healthcare professionals when their professional advocacy group is involved is exceptional. We work closely with the client and their physician's health program (or equivalent organization) to assure a coordinated effort in recovery at a personal and professional level.

- Inpatient detoxification program
- Professional's group
- Professional recovery meetings
- Intensive family therapy
- Highly trained, specialized staff with many years of experience treating professionals
- Formal documentation for return to work requirements
- Work closely with physician health programs (or equivalent organization)
- Aftercare plans developed with physician health program (or equivalent organization)

MAINTAINING PROPER BOUNDARIES COURSES

This 3-day course is jointly sponsored by the University of Texas Southwestern Medical Center and the Santé Institute of Professional Education and Research. The course assists health care professionals with prevention of and intervention with boundary, disruptive behavior and other ethical related issues impacting them professionally and personally. The unique learning environment utilizes didactic presentations, interactive discussions and experiential exercises. The course offers 21 AMA PRA Category 1 Credit(s)[™], including 6 hour(s) in medical ethics and/or professional responsibility.
