D CEO's 2020 Excellence in Healthcare Awards

Santé's CEO, Dennis Wade, MS, FACHE, has been named as a finalist in the *D CEO's* 2020 Excellence in Healthcare Awards program. He is a finalist in the Outstanding Healthcare Advocate category.

D CEO is recognizing individuals and organizations keeping North Texas Healthy, especially during a worldwide pandemic. This year, there were over 200 excellent nominations and we are proud Dennis was among the finalists named from them. Click [here](#) to read the entire *D Magazine* announcement.

For 21 years, Dennis has led the Santé staff in exemplary work as an organization helping patients achieve a strong foundation for their recovery, even during a pandemic. There is a continuous focus on exemplifying the values of Santé; his leadership makes Santé a place of healing and hope. With excellent communication, teamwork, and taking action through the lens of Santé principles and values, he and all the staff have been able to help get patients into the recovery process but also help them stay engaged in their treatment to achieve their therapeutic goals toward long-term recovery.

When asked what he loves about Santé, Dennis replies: **"To be able to deliver the highest quality of care to our patients for almost 25 years while maintaining the highest of standards through all of the ups and downs of the addiction treatment/mental health arena."**

Excellent treatment should not be rare, promoting recovery should not be overlooked, reducing stigma should not be hard, and showing compassion should not be uncomfortable. After more than four decades in the mental health industry and 21 years at Santé Center for Healing, Dennis Wade has done all of these things - quietly and without hesitation. When you meet Dennis, he will always direct your attention to the people working at Santé first as the reason for its longevity and the patients who commit to the hard word. We join *D CEO* in recognizing the incredible leadership Dennis has shown at Santé's helm in 2020 and all the preceding years.

Step 9

“Made direct amends to such people wherever possible, except when to do so would injure them or others.”

Knowing When to Speak

Step Nine is about an addict making amends to those they have hurt. It is difficult to know when or how to right our wrongs towards those we love and whether it will benefit or hurt them. It takes discipline and guidance from a sponsor to know when to make these amends, to whom we should make amends, and how much we should disclose when doing so. This step can cause anxiety and stress for many addicts. Those on the receiving end may not be receptive or ready to hear us out. Reaching out to a sponsor or mentor is a must in these situations. It takes courage to open ourselves up to the possibility of hurt or rejection. On the other hand, there is a freedom that comes with making a sincere apology and righting the wrongs that we inflicted during our active addiction.

Removing Threats to Sobriety

Step Nine restores in me a feeling of belonging, not only to the human race but also to the everyday world. First, the Step makes me leave the safety of A.A., so that I may deal with non-A.A. people "out there," on their terms, not mine. It is a frightening but necessary action if I am to get back into life. Second, Step Nine allows me to remove threats to my sobriety by healing past relationships. Step Nine points the way to a more serene sobriety by letting me clear away past wreckage, lest it bring me down. - from the book *Daily Reflections*

Why are Women Drinking More

The number of women drinking and how much they are drinking is higher than it has ever been before. A 2017 study sponsored by the National Institute on Alcohol Abuse and

Alcoholism revealed that from 2001 to 2013, the prevalence of alcohol use among women in the U.S. rose nearly 16%. And during the same time frame, the percentage of women who have four or more drinks on a given day on a weekly basis shot up 58%.¹

Many women feel the stresses from parenting, helping elderly parents, career and financial pressure and, recently, the stresses surrounding the COVID 19 pandemic. Many of these stresses are not new to women, but the way drinking has become so intertwined to relaxing and normalized in general is.¹
