

WHY CHOOSE
SANTÉ CENTER FOR HEALING?

The Santé Advantage

Santé is about **you**
and what is going on
individually with you.
Others are about addiction.

Privately Owned & Operated for
Over 25 Years

We are proud of our distinguished past and look to the
future for even greater achievements.

THE SANTÉ ADVANTAGE

- Privately owned and operated for over 25 years with the clients' best interest at the forefront (not corporate investors' interests)
- **Individualized treatment** in an intimate environment
- **Expertise** in the interaction between chemical addiction, behavioral/process addictions and mental health diagnosis; address and treat simultaneously
- **Team approach**; each client's treatment team includes: primary therapist, psychiatrist, nurse, dietitian, mental health technician, family therapist, discharge/aftercare planner, alumni coordinator and support staff
- All clinicians are **masters level (minimum)** with additional training, certifications and credentialing
- **Medical staff** – Santé's Medical Director, psychiatrists, addictionologists, psychiatric nurse practitioners, and chemical addiction registered nurses see clients regularly and as part of the continuum of care
- **Length of stay is unique to each individual** and gauged by goals achieved, not by insurance companies. Addiction is a chronic disease; getting to the core, often trauma-level issue, even deeper than the physical and psychological negative effect of substance abuse, takes time. Research proves longer lengths of stay reduce the likelihood of relapse and increase the chances of long-term recovery
- **1:6 ratio** of clinicians to clients
- **Deep, life-changing work.** We won't tell you that this is easy or that 30 days or less is a quick fix
- Providing **individualized and peer support services** to the friends and family surrounding our clients to increase the health and recovery-supportive ecosystem
- Hold ourselves to a **higher standard** than the treatment industry's norm, as evidenced by 6 years of CARF accreditation
- **Masters-level clinicians in Admissions department** (not a call center) are available via phone 24 hours a day, 7 days per week
- **Always working to get individuals into treatment they need** by providing numerous, individualized options for the financial costs associated with the investment in recovery, including but not limited to: in-network insurance with major carriers, accessing out of network benefits, working with behavioral health finance companies and creating individualized plans unique to each client and their family. If you figure the cost of continued substance abuse and associated medical, legal and other consequences, the investment in yourself – in life, in hope, in healing, in your recovery – is a better investment
- Uncomplicated, one location offering evidence-based **continuum of care** (assessments, medical detox, residential, intensive outpatient, transitional living, family services, outpatient counseling, telemedicine, intensive workshops, educational courses and alumni support)
- **Relapse prevention** is a critical piece of the recovery journey, especially for those who have experienced chronic relapses previous to their time at Santé
- Recovery is a lifelong process and Santé's alumni support is, too.
- **WE WON'T GIVE UP ON OUR CLIENTS.**
