

# SANTÉ CENTER FOR HEALING'S Licensed Professional Assessment Program

SPECIALIZING IN TREATING PROFESSIONALS SINCE 1996

Santé's Licensed Professional Assessment (LPA) program offers a fair, precise and objective investigation of the professional in crisis. Data collected during the assessment is then used to gauge the professional's ability to return to work, provide monitoring recommendations and/or the necessity for the professional to seek further addiction treatment or other intervention. This information is provided in a formal written report to the referral partner within a timeframe agreed upon with the respective organization.

## ASSESSMENT OVERVIEW

- Biopsychosocial assessment
- Family systems assessment
- Onsite psychological testing
- History and examination by psychologist with psychological screening
- Additional testing, if necessary, including polygraphs
- Preliminary results are given the day after discharge
- Drug testing with chain-of-custody provisions
- Clinical assessment and interviews
- Nursing assessment
- Clinical polygraph examination
- Spiritual assessment
- Timely written report to referral source
- Collection of data from collateral sources, as deemed necessary
- Verbal and written recommendations are given to the board and to the individual being assessed the day after the assessment

## WHY PROFESSIONAL ASSESSMENTS?

These assessments are facilitated by a multidisciplinary team involving addiction certified psychiatrists, licensed mental health therapists, and other medical staff. Santé's assessments are tailored to the specific needs of the professional; therefore, the different types of testing can vary from one individual to another.

"Santé provides a unique approach to professionals and we would love for you to be involved, to see it first hand, and to meet with everyone who would be working with your client. We think that helps to provide an intimate touch so you can get to know us better and trust that we are providing the best care."
