MEET OUR IOP CLINICAL TEAM

Santé Center for Healing provides integrity-driven, evidence-based, & personalized long-term recovery customized for those suffering from substance use disorders, mental health, trauma, compulsive sexual behavior disorder, co-occurring disordered eating & other compulsive behaviors. Founded in 1996, Santé celebrates 30 years of service in 2026.

Read on for more about compulsive sexual behavior disorder & the CSAT credentialing many of our clinicians have earned.

ALL ABOUT “CSAT” CERTIFIED SEX ADDICTION THERAPISTS

Compulsive Sexual Behavior Disorder (CSBD) is a distinct impulse control disorder. CSBD is characterized by persistent, unsuccessful attempts to control intense sexual urges, leading to repetitive sexual behaviors over six months or longer.

CSAT Training & Credentialing equips mental health professionals with advanced expertise in treating compulsive sexual behavior.

KEY SYMPTOMS OF CSBD INCLUDE

- Overwhelming preoccupation with sexual activities that interferes with daily life, health, & responsibilities.
- Repeated unsuccessful attempts to reduce or control sexual behaviors.
- Continued engagement in sexual activities despite negative consequences to self & others.
